Medical Futility Law and Ethics: Where Are We Now?

Thaddeus Mason Pope, J.D., Ph.D.

HealthPartners & Regions Hospital Quarterly Ethics Grand Rounds

December 10, 2013

1

Thaddeus Pope, J.D. Ph.D. indicated **NO** relevant personal financial relationships or intent to discuss an off-label / investigative use of a commercial product or device.

2

ACCME Core Competencies

Patient Care: Practitioners are expected to provide patient care that is compassionate, appropriate, and effective for the promotion of health, prevention of illness, treatment of disease and at the end of life.
Medical Knowledge: Practitioners are expected to demonstrate knowledge of established and evolving biomedical, clinical and social sciences, and the application of their knowledge to patient care and the education of others.
Practice Based Learning and Improvement: Practitioners are expected to be able to use scientific evidence and methods to investigate, evaluate, and improve patient care.
Interpersonal and Communication Skills: Practitioners are expected to demonstrate interpersonal and communication skills that enable them to establish and maintain professional relationships with patients, families and other members of the health care teams.
Professionalism: Practitioners are expected to demonstrate behaviors that reflect a commitment to continuous professional development, ethical practice, and understanding and sensitivity to diversity, and a responsible attitude towards their patients, their profession, and society.
Systems Based Practice: Practitioners are expected to demonstrate both an understanding of the contexts and systems in which health care is provided, and the ability to apply this knowledge to improve and optimize healthcare.

3

The HealthPartners Institute for Education and Research designates this live activity for a maximum of 1.0 AMA PRA Category 1 Credit(s)TM. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

This program has been designed to meet the Minnesota Board of Nursing criteria for 1.2 contact hours of required continuing education. It is the responsibility of each nurse to determine whether a continuing education activity meets the criteria established by the Minnesota Board of Nursing.

Other professional credits for continuing education (CEU) are available, per the standards of those professional organizations.

4

All evaluations, transcripts and CEUs are now being managed on myLearning. Your attendance at the Grand Rounds will be noted in myLearning by the end of today.

- This information is added from the sign-in sheets so please make sure your name is legible.
- For those attending by remote access --- please send your sign-in sheets to the person listed on the form.
- When you log into myLearning you will see your attendance noted in the Grand Rounds session and you will be able to:
  - View your learning activity details
  - Complete your evaluations
  - Claim CEU credit
  - Print transcripts and certificates for your records
  - Pre-register for upcoming Ethics Grand Rounds

There are a lot of pagers and cell phones in this room --- please keep them on silent. If you must leave and return, please do so as quietly as possible.
Bathrooms are available outside either exit door and telephones are available out the door to your right.

5

Objectives:

1. Understand current legal developments related to medical futility policies.
2. Learn how law and ethics interact around the topic of medical futility.
3. Appreciate how discussions of medical futility relate to clinical practices.

There will be time for questions at the end of the presentation.

By Mary Brophy Marcus, USA TODAY

In the past, most patients placed their entire trust in the hands of their physician. Your doc said you needed a certain medical test, you got it.

Not so much anymore.

Jeff Chappell of Montgomery, Ala., recalls a visit a couple of years ago to a Charlotte emergency room, near where the family

District Court
Probate Division
Judicial District: Fourth
Court File No. 27-GC-PR-111-16

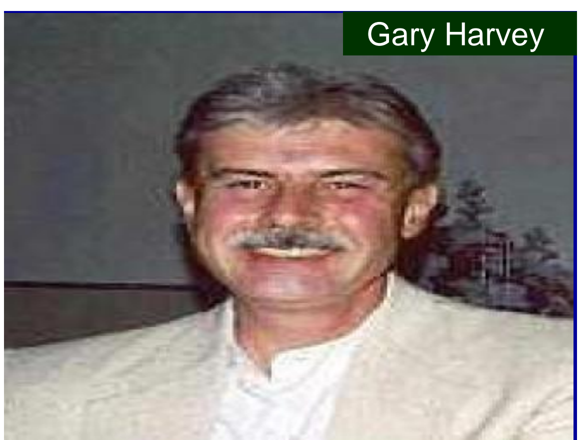
In Re: Emergency Guardianship of

Albert N. Barnes,
Respondent

Order Appointing Emergency Guardian

This matter came on for hearing on February 2, 2011 before the District Court on a petition seeking an emergency appointment of a guardian for the Respondent named above. The matter, having been considered by the Court and the Court being duly advised in the premises now makes the following:

FINDINGS OF FACT



“failed to follow medical advice”

“failed to use good judgment”

Your own personal issues are “impacting your decisions”

“Refocus your assessment”

AMA Code Ethics 2.20

Though the surrogate's decision . . . should **almost always** be accepted . . . situations . . . may require . . . institutional or judicial review . . .

HOUSE OF DELEGATES

Resolution: C-5
(A-09)

Subject: Legal Protection for Physicians When Treatment is Considered Futile

Introduced by: King County Medical Society Delegation

Referred to: Reference Committee C

RESOLUTION 1 - 2004
(read about the *action* taken on this resolution)

Subject: Futility of Care

Introduced by: Michael Katzoff, MD and the Medical Society of Milwaukee County

RESOLVED, That the Wisconsin Medical Society, concurrent with a recommendation of the American Medical Association, Medical Futility in End-of-Life Care policy E-2.037, supports the passage of state legislation which establishes a legally sanctioned extra-judicial process for resolving disputes regarding futile care, modeled after the Texas Advanced Directives Act of 1999.

HIPAA PERMITS DISCLOSURE OF COLST TO OTHER HEALTH CARE PROFESSIONALS AS NECESSARY

DNR/COLST CLINICIAN ORDERS for DNR/CPR and OTHER LIFE SUSTAINING TREATMENT	Patient Last Name Patient First/Middle Initial Date of Birth

FIRST follow these orders, THEN contact Clinician.

(If patient/resident has no pulse and/or no respirations)

A	DO NOT RESUSCITATE (DNR) ☐ DNR/Do Not Attempt Resuscitation (Allow Natural Death)	CARDIOPULMONARY RESUSCITATION (CPR) ☐ CPR/Attempt Resuscitation

For patient who is breathing and/or has a pulse, GO TO SECTION B – G, PAGE 2 FOR OTHER INSTRUCTIONS. CLINICIANS MUST COMPLETE SECTIONS A-1 THROUGH A-5

A-1 Basis for DNR Order
Informed Consent - Complete Section A-2
Futility - Complete Section A-3

A-2 Informed Consent
Informed Consent for this DO NOT RESUSCITATE (DNR) Order has been obtained from:

Name of Person Giving Informed Consent (Can be Patient) | Relationship to Patient (Write "self" if Patient)

Signature (If Available)

A-3 Futility (required if no consent)
☐ I have determined that resuscitation would not prevent the imminent death of this patient should the patient experience cardiopulmonary arrest. Another clinician has also so determined.

MM 2 2012 Page 1 of 2

Maryland Medical Orders for Life-Sustaining Treatment (MOLST)

Patient's Last Name, First, Middle Initial	Date of Birth	☐ Male ☐ Female

This form includes medical orders for Emergency Medical Services (EMS) and other medical personnel regarding cardiopulmonary resuscitation and other life-sustaining treatment options for a specific patient. It is valid in all health care facilities and programs throughout Maryland. This order form shall be kept with other active medical orders in the patient's medical record. The physician or nurse practitioner must accurately and legibly complete the form and then sign and date it. The physician or nurse practitioner shall select only 1 choice in Section 1 and only 1 choice in any of the other Sections that apply to this patient. If any of Sections 2-9 do not apply, leave them blank. A copy or the original of every completed MOLST form must be given to the patient or authorized decision maker within 48 hours of completion of the form or sooner if the patient is discharged or transferred.

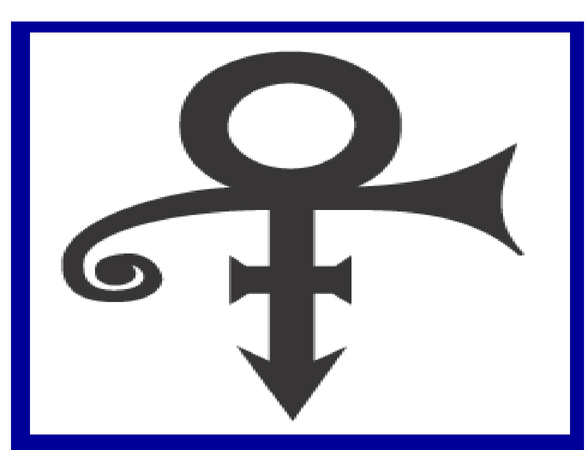
CERTIFICATION FOR THE BASIS OF THESE ORDERS: Mark any and all that apply.

I hereby certify that these orders are entered as a result of a discussion with and the informed consent of:
_______ the patient; or
_______ the patient's health care agent as named in the patient's advance directive; or
_______ the patient's guardian of the person as per the authority granted by a court order; or
_______ the patient's surrogate as per the authority granted by the Heath Care Decisions Act; or
_______ if the patient is a minor, the patient's legal guardian or another legally authorized adult.

Or, I hereby certify that these orders are based on:
_______ instructions in the patient's advance directive; or
_______ other legal authority in accordance with all provisions of the Health Care Decisions Act. All supporting documentation must be contained in the patient's medical records.

New ATS Policy

261



1. Futile
2. Inappropriate
3. Provisionally inappropriate

269

Futile treatment	Interventions that cannot accomplish the intended physiological goals	1) Clinicians should explain that the requested treatment is ineffective and explore the surrogates' reasons for the request. 2) If conflict persists or if there is any doubt about the futility determination, clinicians should consult another qualified provider to evaluate the case. 3) Clinicians should consider expert consultation to mediate the conflict. 4) Institutions should retrospectively review the case to identify opportunities to prevent future similar occurrences.	1. A surrogate requests antibiotics as treatment for an acute MI in a critically ill patient. 2. A clinician refuses to provide CPR in a patient with rigor mortis.

Inappropriate Treatment	Treatments which may accomplish an effect desired by the patient, but for which there are widely accepted rules that prohibit their use	1) Clinicians should work to understand the reason for the request and clearly communicate the rule that governs the request. 2) Clinicians should involve individuals with expertise in interpreting existing regulations to ensure the rule is correctly interpreted and applied. 3) Clinicians should consider involving expert consultants to assist in clear communication and psychosocial support. 4) Institutions should retrospectively review these cases to identify opportunities to prevent future similar occurrences.	1. A surrogate requests long term ventilator support to a patient who is brain dead (in a state in which there are statutes permitting unilateral cessation of treatment in brain dead patients). 2. A surrogate requests that clinicians circumvent the lung organ allocation policy to help a critically ill patient get faster access to an organ for transplantation. 3. A patient requests a prescription for a lethal dose of barbiturates (in states where PAS is illegal).

Provisionally Inappropriate Treatment	Treatments that have at least some chance of accomplishing the effect sought by the patient or surrogate and are not prohibited by an existing rule, but medical professionals believe that competing ethical considerations justify treatment refusal.	Dispute resolution should be accomplished via the process outlined in recommendation 3 and in **Table 3**.	1. A surrogate requests ongoing mechanical ventilation for a patient with widely metastatic cancer and refractory multi-organ failure with progressive extremity necrosis from high-dose vasopressors. 2. A surrogate requests initiation of dialysis for a patient in a persistent vegetative state

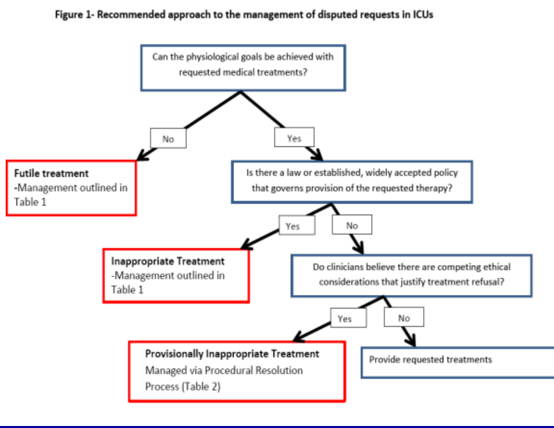


Table 2- Model policy highlighting procedural steps for resolution of conflict regarding life-sustaining treatments

1)	Prior to initiation of and throughout the formal dispute resolution procedure, clinicians should enlist expert consultation to aid in achieving a negotiated agreement.
2)	Surrogate(s) should be given clear notification in writing regarding the initiation of the formal conflict resolution procedure and the steps and timeline to be expected in this process.
3)	Clinicians should obtain a second and independent medical opinion to verify the diagnosis and prognosis.
4)	There should be case review by an interdisciplinary institutional committee.
5)	If the committee agrees with the clinicians, then clinicians should offer the option to seek a willing provider at another institution and should facilitate this process.
6)	If the committee agrees with the clinicians and no willing provider can be found, surrogate(s) should be informed of their right to seek appeal to an independent body.
7a)	If no willing provider can be found and the surrogate does not seek independent appeal or the appeal affirms the clinicians' position, clinicians may withhold or withdraw the contested treatments, and should provide high quality palliative care.
7b)	If the committee agrees with the patient or surrogate's request for life prolonging treatment, clinicians should provide these treatments or transfer the patient to a willing provider.

Time pressured decisions

Consensus among clinicians present

Case review to extent possible

VIOLATION: *PATIENT RIGHTS*		**Tag No:** A0115

Based on review of policies and procedures, patients' medical records, and staff interviews the hospital failed to notify 1 of 1 patient of the hospital's Medical Futility Policy prior to implementing the policy. This failure does not promote and protect patients' rights, and potentially affects all patients admitted to the hospital.

Findings include:

The hospital changed patient #1's Full Code status to Do Not Resuscitate without the consent of patient #1's HCPOA (health care power of attorney). (A131)
